I am looking for people who are interested in hosting dedicated gaming server(s) or who can act as a backup/redundancy in the US and the EU. The project website is

http://www.phpbbplanet.com/cc95revival/

Any help is greatly and very much appreciated, thank you.

Hi. Are there any specific bandwidth or software requirements you're looking for? I'm assuming the server will run on most POSIX systems. I'd be willing to host a backup/primary server in London or California.

Also willing to help, I have a box in Virginia.

ps. XWIS sucks, people are trying to develop alternatives.
