Hi guys,

im making a site that will (hopefully) host all Renegade-related tutorials, that's why i ask you to send me your tutorial to webmaster@nodnl.net

The site can be found at http://www.nodnl.net and currently hosts 2 tutorials from General Havoc (Teleport and Flag tutorial)

So... please send them in

http://www.nodnl.net/
webmaster@nodnl.net

I will have another 8 tutorials coming out over the next week or two based on scripts from the new DLL. Some of the scripts include:

Team Death Match: Your team wins by getting a certain amount of kills. Killing someone who has respawned and is AFK won't count.

Capture The Flag: Capture a flag a certain amount of times to win

Helipad Controls: Get working helecopter pad on maps using this script.

Stealth Armour: Turns the player who pick this up stealth for a certain amount of time.

These are just a few of them but there are more, Also if you have the knowlege of adding script to maps and getting them working then Jon Wilson is looking for people to help him.

Just FYI, I just uploaded a tutorial that will explain how to use the Boolean Function of Gmax or really any 3d modeling program, and you will learn how to build ladders and bridges, and with this info, you can go nuts and build many things. This is a Step by Step, walk through. hope you Enjoy.

This site is good and I relly need that "Boolean Function" tutorial to get a little head start before I take 3D Modeling & Animation at collage...

where is the tutorial then...

That site rocks by the way I will add it to the links section of my site (which I will make today).
