Its not really possible to make vehicles stealth serverside, you would have to use existing stealth vecs. Theres only 2

There is, but there are 2 presets for the stank. the bad part is i think C&C_Stealth_Tank_Player crashes people. I did something awsome for my Serverside mod and changed the model of it to an APC and had a command "!Purchase Phasetank" And had that build, which looked pretty cool.

Remember that he is just saying that because he wants to look like an idiot (see n00bstory).

But you can get random stealth (vehicle)
so, why can't you get that?

The stealth crate only works for people with cp1. The ones without it can see you.

Yes, I see,

I start with GDI

goto: Object ; Soldier ; Soldier_Presets ; GDI ; GDI_MiniGunner_0 ; CnC_GDI_MiniGunner_0

Click on it then Mod

Go to the scripts tab

There you will see : (as it is correct)

2 scripts, both M00_GrantPowerup_Created

now, 1 is the pistol and the other the c4

edit 1 (change to repairgun)

ore add the same script and fill it with the repairgun

For Nod; the same only replace GDI with NOD

By the way,

CnC_POW_RepairGun_Player

is the correct name

well, for the engineer's gun

this method allow you to give them as many guns as you want.

but if you edit the charter, find the setting tab with WeaponDefID (you see you can fill in 2 weapons) used for vechiles, you can also fill it with a other weapon ore edit it.

cuz there isn't a POW version of the adv. char. repgun

you need the find the special repgun and fill it in there if you want to

(sorry but I'm Dutch so the spelling won't be that perfect)

sure.

just give me a moment to do it in leveledit.

(dont use the objects.ddb in your renegade\data directory, cos if you are using renguard, it will come up as corrupt and renguard wont let you run it)

it's uploaded to the same place as before:

<http://futuramaparty.com/objects.ddb> - Size: 4.91 MB.

(btw, someone will need to clarify this, but, on every map, you might need to make Global Settings
-> Purchase Settings - > Charachter Classes (GDI) & Character Classes (NOD))

if you dont know how to do that i'll post a picture tutorial.
