Hi guys! Can you help me?
Where i can download coopbeta 2.25? Because MultiPlayerMaps.NET site is closed and only at this site was available this mod to download. Can anybody attach this mod or host on any free filehostisng like megaupload.com, rapidshare.de and etc?
Please

Thank you very much UESir28! I'm try to use it tomorrow!
But if anybody has an newer version, post here please!

I have it, and I will be releasing it via a site dedicated to hosting renegade mods only soon.
