---

right, i copied my renegade directory so i have two instances of the game. in the copied instance i put the final renegade cheat as i was curious.

i tried it out on a multiplayer practice, and it would be SO easy to find if someone was using it.

i shot a bot, it died in 1 shot. i destroyed the harvester in less than 10 seconds with the gdi autorifle. i destroyed the airstrip just as fast. and the mammoth tanks rate of fire is so fast, it actually forced my computer to close down renegade instanly.

oh, and to clarify things, i am not a cheater, i wont use this online, dont worry, im not stupid lol, i just thought id report my finding.(even if you know, this is useful for those who dont know what the cheat is, and so they are not tempting to download it.

here is the readme that came with it:

\*\*\*\*\*

Game: Command & conquer Renegade!!! Any Version. FINAL RENEGADE CHEAT PACKAGE WITH BONUS 29 BIG HEADS!

\*\*\*\*\*

### FINAL RENEGADE -"THE ULTIMITE CHEAT"

Description: CONTENTS:

- I. Outline of features
- II. Usage
- III. Possible bugs
- IV. Final notes & Warnings

### I. OUTLINE OF FEATURES

The benefits of this Cheat are as follows:

1. Several characters have will have unlimited ammo.
2. These characters can kill anything (aside from buildings) with only a few shots.
3. Combined with the big head mod, you become invincible on Renegade.
4. Bonus 29 BIG HEADS never before Released Included.
5. Several characters will have Full automatic weapons, "Machine gun type".
6. Hotwires Repair Buildings and Vechs in 1 Second and can dissarm becons in 1 second.
7. When you are the host of the game, buildings can be killed with merely two shots, but this is only the case when YOU ARE THE HOST.

The characters I recommend using are: Havoc, Sakura, Stealth Black Hand, and GDI Soldier. Also, I've found that the Mammoth tank also has a rate of fire similar to that of a machine gun.

## II. USAGE

It is imperative to the functionality of this mod that you follow these instructions to the tee.

Step 1:

Launch C&C: Renegade WITHOUT having already put the "objects.ddb" file in your Renegade\Data directory.

Step 2:

Join a game, and play for atleast 1 game.

Step 3:

When the game you were in Loads up a 2nd time, Alt+Tab and place "objects.ddb" directly in your Renegade\Data directory.

Step 4:

When the game ends and Reloads for a third time ,the cheat will be enabled.

Step 5:

Go back into the game and test it also you may join any server of your choice and this will work online in multiplayer games.

Step 6:

Enjoy! YOU ARE NOW A GOD!

## III. POSSIBLE BUGS

1. "Zero glitch"

If you find that when you shoot anything, your credits and score reset to 0, then follow these instructions:

a. Completely exit Renegade, remove the "objects.ddb" file from your Renegade\Data directory, and resort to section II of this document.

b. If you continue to receive this "zero glitch," follow step a, EXCEPT DO NOT RESORT BACK TO SECTION II of this document.

Join 2 games, play one all of the way through, then join the next. Once the second game is about half way over, Alt+Tab and place the "objects.ddb" file in your Renegade\Data directory. Now you can continue to play this game (but the effects of the mod will not come into play until the next game you play), or you

can leave and join another game.

Once you join the next game, you should see the effects of the mod quite easily, as everything will die very quickly if you're one of the previously mentioned characters.

That's all! You should be able to have some fun with this now!

#### IV. Final notes:

This cheat is by far the most powerfull cheat i have used online, you can destroy a fleet of tanks within seconds,  
if you use this Online , its most likely that an in game modertor will be alerted to the fact your killing everyone  
and everything in sight, thus you may be banned from certian game channels for using this.  
NOTE: Westwood Online and Electronic Arts will not ban you for using this cheat, these cheats are Modifications of  
original game files, the game was designed to be modified thus we see mod maps , skins etc.

I used Final Renegade to play around online the last few games I played before I quit and uninstalled Renegade.

I pissed quite a few moderators and players off that day. That was almost a year ago though.

even then, it's obvious they are cheating in some way, as sniper rifles are now miniguns and shoot about 100 shots in one click.

it would be really obvious too, if you had full health as a tank and a minigunner killed you and your tank extremely fast.

people that use this cheat on online play are really crap or really stupid due to how obvious it is.

and because this cheat is only an objects.ddb, anyone with level edit could easily create one, as it is very easy to modify the presets which changes the objects.ddb

besides when you are playing 22 on 22 and everyone in the server pwns and a player that really knows how to play installs a hack like that what do you do?

They kill at the rate of the best players in the game but no faster, they learn to use the cheat the same way a good player will learn to use the game, they modify the cheat to only do certain things thus reducing detection and testing effectiveness.

then RG came along and people STILL got kicked from fully RG-ed servers for pure pwnage because of the level of paranoia generated by the hack. At one point you couldnt play a game without accepting a certain number of hackers would be playing, imagine an effect so strong that people still get kicked NOW from fully RG-ed games.

---

bad shit and not as obvious as you might think, some of the people I knew that modded before RG but after FR were fooking heroes tbh because they sniffed out 90% of the cheaters, god love em all  
:)

I did see a person using at least a part of that cheat. Thought he was on the NOD team. I belive that there were 2-4 plaers in the whole game, this one guy kept flame rushing over and over, I had an Orca to fend his rushes off, as his Flamer's health came close to 50% percent or less, he would just BRIEFLY jump out of his Flamer and repair it in no time at all. Eventually I got pissed and just left.....FREAKEN BASTARD

I've banned at least 10 FR's during the last month. It's holidays and then the cheating is always a bit worse because 12-13 year olds learn how to use google.

dude#1 wrote on Tue, 15 August 2006 23:43 I was playing on fnfall aow a few days ago and the server said it auto detected a damage modifier hack on someone and kicked them for it. How long have they had that?

Adad (isn't he a member of that community?), made a modified SSAOW which detects damage hacks, atleast that's what HTTBird said. AND it's pretty old because BC has it too, and they added it 1 year ago if I'm right.

Actually it is. Gamelog doesn't give the weapon for damage, and with headshots and C4 it's impossible to tell if a damage hack was used with any degree of accuracy. The only thing you can detect with gamelog is repair hacks.

Add a hook to show which type of weapon was used for the attack? Could be something to consider for bhs.dll.

Gamelog is awful and kills performance anyway.

Why are you all of the sudden pissing on Adad. If it wasn't for Adad, translations and the new FDS serials would be non-existent. Talk about fucking bipolar.

As far as this thread goes, you're beating a dead horse as usual.

ps: The Final Ren hack was made by WSE and therefore has no trojans or viruses. If it was made by an EAX/GX user, then I would worry about trojans/botnets.

It's a warhead type. Just like the tiberium flechette rifle uses a different type of bullete than a plain auto rifle. Something that has its health or sheild set to blammo cannot be hurt by any warhead except one that has blammo killer.

Edit: Oh and as for an example of something that has a blammo sheild would be a pct. I think there's even a preset of the dead nod truck with blammo sheild on it.

I doubt it. C4 can be disarmed by a repairgun and mutants are still harmed by any non-tib weapon.

Blamo is INVINCIBLE.

The instakill warhead is called "BlamoKiller", according to RenegadeWiki.

Cool. Good to know, and thanks for the fix. I've only seen PTs vanish in privately hosted servers. I assume this was from blammo weapons, because there was a hacker with instakill weapons running around...

---
