Greetings

I wanted to set up a server into Renalert but the problem is with Bren bot. I asked a few weeks for help at other admins and moderators of servers and most of them don't know then Seriousj7 said to go to PackHunter but he is very long offline. So I don't know where to get Bren bot 1.43 . Can someone help me.

BRenBot 1.43 is still a beta at the moment, although most servers seem to have got their hands on it. As for packhunter I think he may be on holiday at the moment.

I know but I want it -.- if it is beta or no

EDIT: Oops I pressed the wrong button OMG.

I think its meant to be on this topic -> *topics merged now, link removed*

(waits for the magical merging)

As for getting BRenBot 1.43 I don't give it out myself.

The link does not work cause it pointed to this topic when you posted the reply in a new topic. It was not supposed to point to BR 1.43
