---

I just tried this in hopes to get Renguard working, but alas, it doesn't work.

I get the "Error opening woldata.key for write" error and I am not running renegade or renguard like it said would fix it.

the serial changer is not working for me. it will say that it saves a new serial, but then when i go to change it again, the serial i JUST entered isnt there, and instead it still shows my original serial that i used when installing the game as being saved.
