Crysis, the latest Crytek game coming out later this year or at the start of '07 is going to have MP, which sounds somewhat like Renegade's.

However, the game's new and pumped full of steroids, so to speak. Graphics look like these:

And the recent CGW preview had a lot of information on the multiplayer.

This is something you might want to upgrade for, though it should run with a computer "bought year 2005" or newer.

Indeed it is. The latest screenshots in the magazines are way better than anything I've ever seen before. Topping UE07, for example..
