Subject: Renguard Troubles...

Alright, I'm trying to install RenGuard on my renegade server (Souljas Dedicated AOW). But when I go to run renguard_ssc.exe the command prompt comes up and right after it gets the server list, it just stays at the line "Connected to RenGuard."; and nothing happens.

Any suggestions?

Also, I couldn't find anything really related to my problem using the search feature. However, my apologies if this was already discussed previously.

Thanks,
Q

No one has the same problem?

Tough luck =/

If you install brenbot, it has renguard included. www.brenbot.com

99% of bots have RenGuard included

and that message means your RenRem settings are incorrect

thats cos you have to change the settings to:

pure mode: false
allow players without renguard: true
