http://www.renegade-modxmakers.siteblast.com/The website is LIVE! Finally I'm trying to put the maximum number of tutorials I can find. Also, the missing Realistic Water tutorials will be in there soon (Foam Effect and Realistic Waves).All I ask is that you wait until the website gains more content before making tutorial requests, I'm pretty quite busy lately Plus, any fan-submitted tutorial will be added to our (my) library Enjoy [January 07, 2003, 14:38:

I'm surprised you haven't stolen yourself a life yet. Maybe it's because I have one? Plus, I have Dante's authorization to keep this website up "legally" until his ModX is up again. In another few words, I didn't steal his idea. Congrats, you moron, you have been owned. Well, instead of stating that specifically like you should have... You bring it up now. You're still a lying thief, so just get used to it.

Words can not describe how much I want to bet 20 bucks that 6800 posts from ACK are nothing but telling people how bad they are and how good he is and how dumb they are and how smart he is...telling him to get a life? Very judgemental person you are ACK for somebody who whines too much. [January 07, 2003, 18:45: Message edited by: CatburthRD]

I also own I-10.max and I10.gmax. Why? Well, let us see... Westwood gave the I-10.max file to me, which can be turned into a gmax file by exporting it to 3DS. You can whine about that all you want; I can easily show you a screenshot of I-10.max and the zip file containing it:<http://www.n00bstories.com/image.fetch.php?id=20>

quote:Originally posted by Maimer1:IMO ack is a n00b, the fact that acks maps are advertised on the top of these forums almost leads me to believe that delphi doesnt read what goes on in here and therefore doesnt know how baddly ack is ruining the state of this community. I didnt mind it when he would say "Its Nod not NOD" simply because it was humorous and undestructive. Now however he will say a newbis work is **** instead of simply telling him that it was a good job, and even maybe saying that most people could do better but its a good try. but nope, he has to flame them and deter them from this VERY small community, im GUESSING that 20\% of the people that have left this community are in somewhat guided by ack because of his disregard for this communities health, if he really cared, he would leave andre alone instead of flaming his work and directing attention to andre. The only thing that keeps some people in this community is ACK's giant ego which blocks some people's doorway. Ur a n00b ack and their is very little you can do that will salvage what is left of your reputation, the only thing keeping you afloat is your good maps and the few fans that you have.N00BWhat I can make of that is this: "I don't like you, so I'm fabricating stories!"Basically, you're not the first person who's said "Blah blah Delphi kisses his ass, ACK kisses Westwood's ass, all he cares about is himself, all he does is down other people, all he does is this and that... blah blah blah"Let me put this into perspective, Moronic1: You're not the first person to tell me that I'm going to leave the community and that everyone hates me. You're certainly not the last person, either. But guess what... For over two years now, I've been here. I've been doing the same things, over and over. Guess what? I'm still here, and the 90+ morons just like you who threatened me like this before are all gone, distant memories of hilarity in action. You guys all say the same things over and over... Accuse me of having an ego, but when it all comes down to it... You end up leaving, and you're the one who does it loudly because your ego is so bruised that you cannot go on in the community anymore.But, as Tervel would have said here... "He will keep repeating himself over and over! Interesting as to when this foolish one will learn!"Timeless words that span a millenia... Oh, and one last thing... I don't care about my

reputation. You haven't tarnished it in the slightest. My work is me, and what I produce is what people like. I don't give half a rat's ass about how many people like me. Haven't you learned anything yet? [January 09, 2003, 22:42: Message edited by: aircraftkiller2001]

Ok there are some people out here that actually want to read the forums without seeing pages of flaming because someone said something. ACK although i am grateful for all the work you have done would you think before you post. The person here has put up a very useful site whilst Dante's Mod Exchange is down i have found it useful. After Dante posted a confirmation that it's ok you continue to post. All the useful modding posts are flooded with flammers belonging to you mainly like the one about the W3D and Gmax conversion. I respect all people who have helped to mod community but your one of the ones who has to flame the forums so we can't read the rest of the useful posts.
