Hello,

today I installed the two Core Patches and after the installation of CP1, my German version of Command & Conquer Renegade (First Decade Version) turned into English. How can I change it into German ?

I hope you can help me.

I think someone would need to extract all his English radio commands from his always.dat so you can put them in your data folder. That would actually get you everything in English, Wiener.

Someone up for this?

This was posted in the RenAlert section because in RenAlert the radiocommands do not work at all. These are the english sounds for the radiocommands. Just extract to your data dir, will work for both Renegade and RenAlert(APB).

Of course the radio commands in APB don't work. They don't exist yet.
