Heya, was looking for some input on my upgraded renegade online page

<http://st.haz3d.com/?server=rg>

you should convert the list a bit more like here <http://ren-hq.de/serverlist.php> or here <http://blackintel.igotfree.com/index.php?page=xwisquery> and maybe only show the players if someone clicks on the servernick via a popup and add the info just like the one site have.

Serve XML, let users display it as they prefer.

Oh, and the ability to order by Players/Map would be nice.

Whow, that useful

Thanks, *link to from my site*

Nice addition, to the xwis.net/xcl/rg/online

I could of used that more when i used to want to check my server stats from school, but it won't do

me much good anymore now that i can just remotly connect

Nice addon though

This is much better than the previous implementation; well done.

Keep what you've got there and serve it as well.

Thanks for the input, keep the comments coming

UESir28 wrote on Wed, 06 September 2006 19:06you should convert the list a bit more like here <http://ren-hq.de/serverlist.php> or here <http://blackintel.igotfree.com/index.php?page=xwisquery> and maybe only show the players if someone clicks on the servernick via a popup and add the info just like the one site have.

The second link doesn't work for me :s. Yes, I would like to include the additional server info shown on the first link I can figure it out on my own, but if you know how the server string is setup, it would speed things up.

I have added a link for REN Servers. You can now click on either REN Servers for the server list or REN Players for a list of players and Servers.

I am investigating the options of using popups or collapsed/expanded lists to show additional info.

light wrote on Wed, 06 September 2006 18:31Serve XML, let users display it as they prefer.

Oh, and the ability to order by Players/Map would be nice.
Yes some ordering capabilities would be nice, I'll see what I can do there.

vloktboky wrote on Fri, 08 September 2006 06:49Keep what you've got there and serve it as well.
Not sure what you mean by serve it? Once the changes are complete and the pages are tested

properly, I will ask to have the updated version uploaded to <http://strike-team.net/xwis/onlinelist/>.

By that I meant push the content into an XML feed as well.

I will have a look at xml feeds to see how easy they would be to implement. How would you want to use them?

Thanks for the feedback guys keep it coming.

It would have to be something that is very clean and contains nothing but raw data with a stagnant format. Something that, say, a server host who also operates a website for their server can easily download and parse in a very straight-forward fashion to get only the data related to their server's current status and show only that. Something like:

```
<WOL_Status>
<ServerList>
<Server Host=aaaaHost1>
<Description>[MYBOT] AOW Server #1!!!</Description>
<Players>8</Players>
<MaxPlayers>10</MaxPlayers>
...(Other data)...
</Server>
<Server>...(Other Server Entry)...</Server>
</ServerList>
<PlayerList>
<[SomePlayersName] Location=aaaHost1>
...(Other Data)...
</[SomePlayersName]>
</PlayerList>
```

</WOL_Status>

You could even throw in something that pertains to the chat rooms or what have you.

Would be nice if either of them implemented a "sort" feature. To be able to sort them by player counts, name etc etc. Just an idea, both are very nice.
