I have a lan exploiter to report. I was just watching the mIRC logs in my admin channel when I spotted this. It starts when he joins and ends on part. He bascily name hacked 3x. The first time it wasnt caught (banned). The second 2 they were IP banned. I would like to ask if something can be done about this...

Im not sure if this is enough proof. But if i remember correctly crimsom can pull up IP's on logins / parts etc. Perhaps this can show what happened?

First Time.

Looks more like a direct connect than a LAN exploit.

that first one is funny:
"u wish u robo freak"
"stop molesting me"

doesn;t Strike own "westwood"? i have seen a "strike test server" with the host username as "westwood"

westwood doesnt exist, strike team doesnt own it. EA shut westwood down more or less.

if cyberpunk is the one crashing your server, the ip would be dynamic, the one you showed me in irc isnt. So its prolly not him. Also he would more then likely use a proxy

I anways thought the nick "westwood" was registerd to St0rmGaming?

They have an FDS under that name to test maps.

He used a special application to retrieve the IP and port of your server and direct connected to it, that's why he could use the strange nicknames.

Im not 100% sure if this applies for other bots/servers but...
If someone uses the nick "Host" ingame.

Quote:<CrazyAOW> Host: This Server 0wns, Donae Today www.aow-21.com

When you talk it appears as "Host: >message<". Which to me deserves a ban. As for the other nicks. They shouldnt be used period. As they arent registered to you.

Good job you aren't in control then isn't it?

i bet half the accounts on XWIS are inactive anyway. And for some people we have to join using random nicks on ren ip as we will get banned on sight for our reputations.

why shouldnt someone direct connect to your server?! are they really meant xwis/wol-only?! wouldnt make sense in my opinion... since most dont have a valid serial which is needed for playing on xwis.

thats the reason i made "wolhook".. to get the server ip/port and direct connect to it.
im sorry if someone abuses it.

And you only made an "anti kick" because people should be able to play in a server without being kicked?

And you explain how to bypass server bans because a player paid for the game, hence the server owner who pays 100+ € per month for his server shouldn't be able to ban them?

But all this doesn't count as you got rep on a cheaters forum, THAT is more important!

Your lif is a piece of sh*t you hav brought another scar upon people who actually play fair (I know its a hard concpt for you to grasp), just because you suck balls at this game doesnt mean its fair to give yourself an unfair advantage, Crimson should ban you, and post your IP for us to do what we want with it

no reason for being so offending. and for the record.. i dont even play renegade so i cant "suck balls" at it
and further i really dont know of any good reason for banning me from the forum?! i tried my best to talk friendly and you also wont find any insulting posts of me about your community in the "cheater forums". so dont blame or hate me just because of a oh-the-bad-bad-cheater-principle like cyberpunk for example.

i mean.. just look at your post.. compare my quote and what you replied. do you find that justifiable?

we could go back to my question.. why are there wol only servers?! why do servers owners dont want ppl to direct connect to them? is this making any difference for you?

so i hope youre not so in rage anymore and we talk to each other on a bit more friendly base.

Hi, I only made final renegade so people could have an easier time with the single player mission, it's not my fault everyone uses it to ruin this game in multiplayer.

oh yeah sorry..

ok for the anti kick.. its almost worthless. it was just for the nickname exploit so that you dont get automatically kicked. it was already well known and "exploited" by using WPEpro (winsock packet editor). this wasnt very easy to use of course. so i just automated it. but since joining with any nick / direct connecting isnt actually cheating i dont think its sooo bad and if the server owner wants to kick you he can do it of course.. my antikick wont block this! only the automated wol-kick caused by the nickname exploit. this is superseded anyways by "wolhook" for example.

and i never explained how to avoid or bypass server bans... i just mentioned that they can only ban by ip.. and so you can always change your ip to "bypass" that. but that isnt a secret, is it?

and i surely dont do it for rep at any cheater forum. i have a job, house, family to care about. so searching for reputation or something similar on the internet where i dont know anyone would be very pathetic, wouldnt it?

Do I need to quote the entire topic where you explain what SMAC is and how to spoof it?

I don't care if people can find out ip's and ports with packet sniffer cause 99 % of the cheaters doesn't know what a packet sniffer is. You just make it so easy that every retard that visits the site can do it and for exemple join without a nickname so people can't kick him or join with a moderators nick so they can ban anyone inside.

I assume you want RG 1.04 to be released asap as we all do. Then maybe go ahead and offer to help BHS?

We see first hand wtf you did. Just today alone, we lost 4 good games that were going on becuz 1 guy joined, used fr, I !rg his name, using rg, and the f*cking mod sayed nothing becuz he had rg

btw, it sounds like you came here to brag that you made it easier for cheaters, and im sure everyone would agree we don't want you around here, and deffently we don't want you around our game

if you want something valble to do with your life, go f' up EA

p.s: how come hes still not banned and how come I still dont see his IP?

You're advocating attacks on a company as being "valuable"?

When you had a careers advice meeting at school, did the word "welfare" crop up, out of curiosity?

Good job, someone might actually be nice and connect under your name and make you look good at Renegade.

The point of direct connect is you can connect under whatever name you want.

Plus, if someone says, we got a cw, this is the ip,

You can stick it straight in and connect, without having to look for the bloody server.

But hey, your that retarded you wouldn't even know how to use renIP.
