

Theboom69 wrote on Thu, 14 September 2006 18:29P.S. Hey nightma can you make a bot that will run a RenAlert APB Server?

BRenBot 1.43 is mostly compatable with APB, and I intend to contact the APB team and find out exactly what the differences are between the servers to make it 100% compatable.

Oh, and there is an FDS tut in the topic underneath this one ->

Quote:P.S. Hey nightma can you make a bot that will run a RenAlert APB Server?

enable BETA updates on the NR Settings tab and update to the latest BETA

then try it on an APB server, what exactly dousnt work on it?

Nightma your bot did not work so well with APB it froze the bot and now it will not open.
