I can't use Renguard ( see previous thread

<http://www.renegadeforums.com/index.php?t=msg&th=19967&am;a%20mp;start=0&rid=20275> )

I've had it up to the neck of being accused of cheating then banned just because i am not using Renguard! The list of servers i can play on has worn extremely thin.

Renguard has made a sterotypical veiw with most players of renegade that is if you are a fairly decent player and you don't use Renguard then you are a cheat.

To get to my point, i was wondering if the makers could please give me a beta version of 1.04, to see if it works without the frustrating error, also is the final version of 1.04 ever going to come out ?

as good as renguard is; those people who depend on it to distinguish between cheats and non-cheats are idiots. time and time again regard has been bypassed, and people cheated with rg running.

there is also alot of good players out there who dont use renguard, who get accused by n00bs of cheating just cos they have been pnwd.
