View Forum Message <> Reply to Message

how can we help you do it by typing it? park near entrance of building, go and throw c4 on front of vehicle, go and refill, put another and keep on doing this just don't wait 30 seconds after you threw your first one....

Generally I use a flamethrower or a flame tank to flame an apc.... or I curse at it violently for running me over....

danpaul88 wrote on Sun, 01 October 2006 14:17Generally I use a flamethrower or a flame tank to flame an apc.... or I curse at it violently for running me over....

lol.

easiest place to do it imo is wf, GDI apc is better for it also imo.

go to first person mode on outside of building and u can access the terminal through the wall, have the apc with the back parked up near you (!bl your apc if u can or noobs will drive off with it)

just chuck timed, turn, e-5 (to refill) and repeat. remember that you can't flame properly with a hottie/tech cos they have 2 timed's.

I find a flaming apc most useful on Under as GDI, a nice clear route out and you often get blocked in the base by arties or have flamers/stanks covering the entrance.

View Forum Message <> Reply to Message

Thanks for the info pirate, I kinda got it...but not to the extent that I wanted. I got around 18 timed c4 on it, but I've seen people get 50+. Do I do Throw, E-5, X(180 turn), throw, e-5, ect?

Prox work best cause you know when they explode and you can be sure of it   My server is a flaming-apc fest! 127 Minelimit

View Forum Message <> Reply to Message

Prox doesn't really work well...does minimum damage, I rather have timed or remote.

park near a pt

Then aim at the front of the apc, while still being able access the PT

Then get a rhythem going. Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5"

Do it as fast as you can, to other people you will just be spitting out c4.

it looks really odd.

proxies are pointless, even if you forget about the criminal waste of the mine limit - one proxy does 30hp damage, that means you would need to get 27 to explode to take out a flame tank. Also it will take you years to load up your apc with enough to do anything and once you have hit one thing you will have to go back.

I have driven a properly flamed apc straight through a whole row of flamers, in comparison a timed c4 will do up to 400 hp damage.

Just remember to check the rules before you try it as some servers don't allow you to flame, if you are unsure check with a mod.

It's all down to practice to get more on, you don't really NEED 50 as long as they are exploding regularly, also check your mouse sensitivity and fiddle with it to make it a little easier.

EDIT: also just thought, it's pretty funny (works best in large games and especially on rush maps) to flame the inside of a building right at the start of a game (hon on islands usually works well) you will usually see a stream of enemy inf pouring out of the tunnels charging in to your building, followed by a few "boink's"

One of the best maps for that is Snow, just load up the back WF door with C4 and watch them come charging through into the maelstrom

Not really...to other people looks like I'm just throwing out random c4, not pileing them ontop of eachother...is it some sort of script?

Not really...to other people looks like I'm just throwing out random c4, not pileing them ontop of eachother...is it some sort of script?

I've heard that some people use the ?x? button (which ever one flips you 180 degree's) so that they just e,5,x,click,x then repeat, I find it easy with the mouse so just do it that way, there may be some way of utilising a script but I have never come across one.

Pretty sure XILDJ did it manually think he would have mentioned if he had found a script as he was always pretty protective of his flaming apc.

View Forum Message <> Reply to Message

If you only use X to turn 180 degrees, your c4's will land on the other c4's.. and when 2 c4 land on each other, only the one on the bottom will blow up.

Park the APC near the PT and look at the PT, then hold V and keep it held down, then press X to face the other way still holding down V for the time period you wish to use it. Since you're now facing away from the terminal (yet renegade thinks you are facing towards it (if you still have V held down)), press E and press 5, then click, then E, 5, click, E, 5, click so on and so forth untill you have a desired ammount of C4 on your vehical.

Remember, DO NOT to let go of V or the effect will be broken and you will have to start again.

Tips:
Point the reticle up a little bit while facing the PT so you can get some distance with the arched throw of the C4.
Keeping the mouse still will make the C4's pile one ontop of the other.
Moving the mouse (still keeping V held down) you can change where the C4 is placed on the vehical, this will diminish highly visible "tails" on your vehical.

This is an engine limitation and is a glitch, it is not a cheat of any kind, what-so-ever.

Matix wrote on Sun, 01 October 2006 20:54Prox work best cause you know when they explode and you can be sure of it   My server is a flaming-apc fest! 127 Minelimit

"lol or OMG you cud use th3s3 new h4x that I have lol - cuz like LoL they R so k00l lolollol" Matix (teh-pwnerer from Rencorner.net) you're a cheating faggot and every time I see you on these forums I am going to call you out for being a twit.

As for people that use flaming apcs (which would explain why you consider your server is a festival for nubs)........flaming ACPs are for n00bs. Any pro player can figure out a way to turn the tide of a battle. It takes one n00b who learns how to do 'flaming apcs' to ruin a good tank fight.

Generally, I stick to the following rules: "If it can be done in real life it should be allowed". Harv walking, sure. Buddy jumping, sure. Ob-dodging, sure. Ob-glitching/walking, no. Flaming apcs, no.

There's a setting for friendly fire, which probably would have been default if people weren't dumb, do a flaming APC with friendly fire on, see how long you last. You may also try doing this in real life, just for funzies

Do it as fast as you can, to other people you will just be spitting out c4.

it looks really odd.

MAN, Is there any shortcut to this?!!!!!!!!!!! It gets kind of annoying after a while, and sometimes, yes I addmit it, I screw up and turn into an Enjineer!

ANOTHER GOOD WAY TO DO IS IS: GO TO THE GAURD TOWER, GO OUTSIDE TO THE RIGH OF IT WHERE YOU CAN ACCESS IT THROUGHT THE WALL, HAVE YOUR VEHICLE FACING YOU, PRESS "E" "5" "X" "THROW" "X" "E" "5" "X" "E" "THROW", THIS IS PROBABLY THE FASTEST WAY TO DO THIS BY YOURSELF.

3) WTF is Tiberium in real life?
4) Can somone explain to me, how you can cary unlimited ammo in pistols or repair guns? o.0

(1) You're a n00b and only play Renegade. Cuz if you played any other game you'd realize that Renegade is one of the few FPS's that turn friendly fire off by default.
(2) Renegade chose to make their repair "weapon" a gun rather than something like a wrench (as seen in other games like BF2).
(3) Tiberium is part of the Command & Conquer storyline and is the equivalent of a radioactive/biohazardous substance ... thus the need for chem suits (chem warriors).
(4) I guess you need an explaination on how to carry and infinite amount of ammo in real life, huh? So that it will support your counter-argument? It's part the game engine so that you don't have to run to the 'armory' (pt) every 10 seconds for a refill.   And it's not infinite anyway, its 999

(5) RENEGADE IS REAL!!!

Greathobo wrote on Mon, 23 October 2006 15:51If you don't like it, thats fine, but other people like to do it. So keep your negative comments to yourself.

As its a public forum, anyone is allowed to post both positive and negatively.

If you came here expecting all players to tell you how to learn such a noobish tactic then you are sadly delusional.

Some will and some wont, tough, learn to live with it.

Noobs ruin the game, but even the newbies dont use Flaming Apcs. Learn to play the game properly and you wont need a Flaming Apc to attack. Better still learn some Team-play, thats a great tactic that alleviates the problem of your base being over-run by vehicles and needing to use Flaming Apcs.
