Alright I'm trying to run setup.exe and I get this....

Setup.exe Application Error

The application failed to initialize properly (0xc0000006). Click on OK to terminate the application.

What is it?

Uh. What?

Edit: 'K. Just checking.

I was gonna run it again and this happened another problem!

Could not find F:\DXSetup\Setup.exe. Try exiting all windows programs and rerun the Setup program or run DXSetup.exe from the Cdrom disk.
