This is very strange indd. Does your mouse use specific drivers?

Rofl, No wonder it was 1p

try messing about in this menu..

I'm preety sure that Mouse Bar is for In-game only, It's worth the shot, eh?

If you can see the windows cursor that means Renegade is not selected as the current application.. are you running any other programs which might be using DirectInput and interfering with Renegade? Try closing ALL other programs before loading renegade.

You could also try alt tabbing out and back into renegade to make sure it gets selected...
