With xwis, all you need to do is log in with a nickname. If the nickname is not taken then xwis will register it for you.

I believe the limit is 9 nicknames. If you want to register a new one, you must delete an old one. Deleting a nick removes it forever, you cannot re-register it.

That's because you don't need to "create" a nickname, it creates it automatically the first time you login in with it (assuming that it has not been taken by someone else).
