Hey guys! i just wanted to ask if BRENBOT has the "!bl" command available, 'cause i looked for it in the commands file and it isnt there!!! Is it automatically in it??

If not, can anyone give me the link to download HerrRegulator? Or the BlazeRegulator please? I heard they were good regulators.

THANKS SO MUCH FOR UR HELP!!

Brenbot does not include these "automatically". You need to download and install SSAOW 1.5 to have this command work.

[www.renegadewiki.com](http://www.renegadewiki.com) -> useful programs <- find the link in there

Brenbot has a variety of different commands that can be installed through SSAOW and new plugins. Check the renegade wiki and these forums for more updates.

It depends if he wants the !bl (bind-lock) command, or the buildings health command.

The !bl (bind-lock) command is part of SSAOW, just install SSAOW 1.5 and it will work.

The building health command is !buildings. The alias !bl was removed by default a while ago due to the clash with the bind-lock command.

It seems that if you wanted to check a buildings health it would be easier just to hold the "k" key (default key) which displays the health of both teams buildings and on some maps even the harvester ("J" key also works but it is only your teams buildings).
