That's pretty nice Dante! Good Job. I was wondering if there could be some sort of count down message for how many times it's been captured, etc?Also, Try throwing your C4 when you have the flag. Could this be "tweaked" to use a character that follows you instead of a flag? [January 12, 2003, 20:22: Message edited by: Ingrownlip]

When I took the flag my gun was gone but when i looked down or up i saw it. Also when i tried to place timed or remote C4 it would stick to the flag. So it would kill me.

Couldn't you just make the flag non-projectile collidable?
