There is a topic in Technical Help about a guy who lost his reticle plus his HUD.

To be honest I thought it'd be cool to try playing without a ret, and I was wondering if it's possible to make one?

I know there's one already made but it was faster for me to just make one like that..
Here ya go.

Wow, that's a quick response!

Thanks for the ret, i'll try it out and report back on whether I like it.

No problem, it only took me about 30 seconds to make, I hope it works well for you.

There was a fanmap I played which disabled reticles and the player name/health bar completely in some area's. It was pretty hard to kill each other.

It makes sniping pretty much impossible.
