I have one, but it's too big to add here as an attachment.

Use the search function (look up) and search for it.

If you have RenGuard installed, Just click Renegade, Get past the Rg Screen, when Renegade start's, Click cancel and carry on to the multiplayer menu.

Have fun!

Neither of the links work.

That is odd because if I recall correctly, those two links were just recently posted in another topic. And if you use the search feature in these forums for "Renegade no cd crack" you can find numerous topics with references to no cd cracks.

Well, Merovingian already gave me a crack as he said.

If you took the time to click the links, you'd realize that neither of them work.

As far as the search goes, I searched for "no-cd" and nothing came up, so I would only assume a more specific search would also yield no results. Maybe I'm wrong. Which it seems I am, since I just searched for exactly as you suggested and 98 things popped up. I stand corrected, however, the forum search sucks.

Well that would be optimal, since I don't have RenGuard and have no intention of getting it. I don't need a program to tell me when someone's cheating.

It doesn't tell you others are cheating. It tells you they -might- be cheating, and besides, it's purpose is to tell you you're not cheating.
