This is why I hate to play Renegade these days, and it's because of Renguard. I got kicked out of 3 serves because I was suspected of cheating. Stupid servers.

So I tried playing RG one day and it wouldnt let me, Renguard kept stopping me. I uninstalled it and tried to reistall it back to see if it worked. Then this came out.

And when I press OK This is what I get

Anyone Have an Idea on how to fix this?

He's saying go into your Renegade folder and delete game.exe then rename game2.exe to game.exe.
