When I click on Renegade on First Decade menu a renguard thing comes up, but it's a blank screen! Then it stops responding. How can I play renegade?

P.S. When I use the other "Icons" the multiplayer internet doesn't work!

Which Operating system do you use? Most people these days will be running either:

XP: Bright, blue and colourful (at least to start with)
Win2K (or 2000): Grey (I think, never used it)
Win 98: Also grey (I think)

If you run either Win2K or 98 I believe RenGuard does not work on those systems....

Make sure your firewall isn't blocking Internet access to RenGuard.
