first of all...translate that so we can understand it. second of all, we need the map you are making
so we know what is could be causing it.

I think he said he can't pickup the flag.... I think...

Create a script zone on the pedestal, and add a script to spawn the flag, and when a member of
the enemy team comes into the zone use Attach_Object_To_Bone() to make it follow them.

There are probably some scripts available to do this for you already... or you could just download
an existing CTF mod...
