Okay i tried to install the latest patch but i keep getting this "Could'nt find Renegade Install directory. You should re-install the game from CD." Okay this seems pretty obvious that my problem is that i installed the game in my C&C games folder in program files so my question is how do i get this thing to update the game without having to reinstall?

Okay so its not in program files...would my game still work if i just copy and pasted the whole game to c/westwood/renegade

Edit: okay i tried that and i still get "Could'nt find Renegade Install directory. You should re-install the game from CD." when i try to update the game.

You're missing registry values so install the game from the disk.

There's too many registry values and they should be made/edited by someone who knows what they're doing in the registry.

If you have The First Decade, you don't need to update at all.

I guess someone could be kind and extract those keys from their registry (minus their CD key one :s) and upload them...

do you have any idea how many keys there are, and how long it would take to hunt down every single one? its quicker to just reinstall the damn game from the cd.
