hmm, do you have SSAOW 1.4 installed? (yes i know SSAOW 1.5 but it has bugs)

how many commands don't work? / what commands dont work? can cloudyserv send anything to
the FDS?

I just installed SSAOW 1.4. still it commands dont work:
!msg
!atm
!amsg
!gameinfo
etc.

if !msg doesn't I don't think it can send anything to the FDS

about the WOLSPY, also the !msg and !amsg and !cmsg commands are only for IRC.

!msg and such not working means your remote admin settings are wrong. Make sure in the server
settings you have AllowRemoteAdmin = true, that catches a lot of people out.

At least it would for brenbot, not sure about CS
