Ok, On the 360 website, it says "Play an array of original Xbox games - Hard Drive Required***". So does this mean that I need the harddrive to play old xbox games?. I know, it's a stupid question but I just had no clue as to what it meant.

Most likely since you'll need something to store them on.

The 360 uses an emulator to allow you to play some XBox games.

This emulator has to be stored somewhere, hence the need for the hard drive.

You need the hard drive to allow the emulation software to be downloaded. And if you are buying the core system you are a dumbass. There are so many things that having the hard drive adds to the experience. Stop being a shit head and save your money.

No, there's two different types of Xbox 360 packages you can buy. You can buy the pro package, which comes with the hard drive and all the extra trimmings, or you can buy the core package, which comes with the system, a controller, and nothing else.

wrestlingdude1f*ck xbox 360 and f*ck bill gates.

Oh yes, of course, blame the company for your own short comings, idiot.

No, they don't, but the PS3 does.

No, they don't, but the PS3 does.

Unforatunately \, you either canbt get it because it is sold out, or because sony decides to ingore
you till march ...

No, they don't, but the PS3 does.

At over 150% price.

No, they don't, but the PS3 does.

At over 150% price.

You make it sound like I was lifting the PS3 up over the 360. I'd buy a 360 with my own money, but I spend most of mine on my PC.

Lol, why does a game system need 30GB or 60GB of HDD space?

And why would pay \$700 for a PS3 (with nothing new-gen about it)

btw, Blu-Ray sucks, HD > All (mine runs on a 1080p)

Game updates, emulators for backwards compatibility, game saves... the list goes on.

You're just wrong here.

Blu-Ray is a gimmick, but not so much as HD-DVD.

How is Blu-Ray a gimmick? It just holds much more space than a DVD. Same with HD-DVD, except that it holds less than a Blue-Ray disc.

I was only trying to blend in with the crowd, but I really would like Blu-Ray to dominate my future media. 50GB on one disk.
