find the map file .mix or .pkg and put them in your renegade files in the "data" folder.then either play online with others who have it by hosting or joining, or go to lan game and select what map you want to play, then set the number of players to 1. that will let you play alone to practice on that map.

here is a screenie of where it should be:<http://www.n00bstories.com/image.fetch.php?id=1243687605>you see there are map files in there, like C&c\_DMcenter.mixl don't know what they are but the .thu files should be with the map file also.
