My screen resolution is 1280x768 but when i set it to that in the Renegade Config and then play renegade it just zooms in and this annoys me!! I tried every single resolution!!! but none work!

I'd say leave it, most 3d Apps override your resolution because they will look silly in different ones.

1280x800 is widescreen at a 16:10 ratio, not 1280x768.

Widescreen LCD monitors for PCs are 16:10. An HDTV and anything else is 16:9. I have no idea why widescreen PC monitors are 16:10, but all I've ever been able to figure out is that they just are.
