Ah very nice wallpapers.

Do I have your premission to add them to the wallpaper part of game-maps.net?

Those are some nice wallpapers. You should do one with the GDI A-10.

Awesome

Could you make one with a Nod Mobile artillery/Apache up? (same as Light tank style) Please

Good job, the borders spoil it though.

Everybody can host these wallpapers. The only condition is that my name appears below.

@all: These links here will not work anymore (in a few days) because I'm going to delete the wp-files from my space.

Renegadecommunity.com has a link to this topic but I told them that they can host my wallpapers. So you can download my wallpapers from here (hopefully).

Edit: I think I will try some more wallpapers. Especially when C&C Reborn is out.

Very Nice, Great Job.

Would be cool If you could add a Apatchie!

800 X 600 anyone?

Great work though. <3 them

Why would you want an 800x600 walpaper?

Even if you were running 800x600 there isnt anything bad about having a 1024x768 walpaper on.

You could download the 1024*768 and resize it to 800*600 if you really feel the need .

Already did. <3 GDI mammoth tanks.
I only have it on 800X600 because I can't read the writing otherwise.

You don't need the wallpaper to be 800x600. Anything that is a higher resolution and set as the background will automatically downscale, as long as you have the setting on "stretch". No quality is lost.
