Edit: problem fixed by stealtheye

hi,

I installed the brenbot core patch which i downloaded from there site.

I made the mistake by installing it in the renegade folder.

not in the renegadeFDS/server file. Now I can't play renegade anymore. I can open the game but when I join/start a game it crashes.

Maybe I need new scripts? Uninstalling renegade is a problem cause I don't know where my Cd's are

When I Join a channel the loading progres goes very slow, slow like i had a year ago? cant remember when it changed. but it crashes when done loading.

Can someone help me whit this problem?

thanks in advance

~xocertzert

Edit: Thanks stealtheye
