Same place as everyone else

`ftp://ftp.westwood.com/pub/renegade/`

Its in there somewhere.

There is no special LE for TFD users, you just need to edit a registry value to make it work.

Edit the regisrty value to say that renegade is installed somewhere that is not default with TFD.

Go to TFD's Ren directory, copy it and paste it into C:\Westwood\Renegade\ then open the registry editor, scroll to westwood and change the install dir to that new directory. That will make LE get all it's presets from that directory (it's the only way (if not, it will crash or not load the presets)).

The easiest fix, boom, is the same fix for RG users with TFD.

Go to where it lists all the games in TFD in your C Drive. Like C:\Program Files\EA games\Command & Conquer The First Decade.

Where it shows all the folders for the games like "Command & Conquer Generals (tm)" and "Command & Conquer Renegade (tm)" just right click on the Renegade folder, click rename, and delete the "TM" from the name.

You will be able to use renegade stuff in LVL edit now. The only problem is that you won't be able to launch renegade from TFD launcher. So just create a shortcut to game.exe from that folder, and put it on your desktop.
