Simple and quick:

http://www.renegadewiki.com/index.php?title=How_to_compile_the_scripts.dll

actually its quite the oppsite, it takes a lot of downloading.

What about if i wanted to edit a script?

Or make it for somthing that i did not make?

You would need C++ coding knowlege before you even try to look at the source of scripts.dll.

If you want to learn it, look for DCOM's learning program as C++ is included in that.

Mk i found out what it all is this is what im useing.

Visual C++ 2005 express edition.

Microsoft platform SDK for windows server 2003 R2.

And the VCbuild.
