The error report spelt parsing wrong

Have you enabled the beta updates for NR? Nightma usually tells people to do this when they post problems, so it might help you

I got a fix for it and my pc can handle it but this one is not my server mine is HFzAOW.

The one we are having problem's with is HFzCTF.

Use the most recent version of ssctf or check you CTF_Settings.ini to make sure its all correct.

Basically SSCTF is outputting shit into the renlogs which NR cant handle.

go to your admin channel, NR should be outputting more information on the error, think you could get me that info? lol

EDIT: if this is what i think it is.. basically SSCTF is outputted the message to renlog but its NOT putting in the timestamp, thus.. NRs getting an error

this is fixed on BETA 6 (which will be released shortly)
