I am looking for someone who can make bump maps (and will be able to make the needed maps ASAP since we need them right away

If you dont know how to make bump maps (or dont know what bump maps are), dont post in this thread. Only post in this thread if you can help with the bump maps we need.

It really depends what your looking for here. I can do bump mapping in renx if thats what you mean. I can make bump map textures from an image itself , but this is something that requires a bit of fine tuning and practice to get the right effects.

It really depends what the base texture is.

[http://img.photobucket.com/albums/v160/blazea58/LevelEdit2006-08-3112-19-19-81.j pg](http://img.photobucket.com/albums/v160/blazea58/LevelEdit2006-08-3112-19-19-81.jpg)

Thats an example.

We need actual bump maps (aka height maps) made from actual textures.
Specifically, we need bump maps for the following textures from stock renegade:

atr_metal02

emp_bags

gd_metl

gdi_base

gdi_con

gdi_trim

hnd_cndt

hpad_bolt

ob_ribs

pwr_mtl_beam01

ref_corg

ref_gdilogo

ref_pipe

v_nod_flame

Do you want it in .w3d or RenX.

Well here are the first 10:

File Attachments

- 1) [atr_metal2.W3D](#), downloaded 105 times
 - 2) [emp_bages.W3D](#), downloaded 84 times
 - 3) [gd_metal_box.W3D](#), downloaded 102 times
 - 4) [gdi_base.W3D](#), downloaded 90 times
 - 5) [gdi_con.W3D](#), downloaded 81 times
 - 6) [gdi_metal.W3D](#), downloaded 150 times
 - 7) [gdi_trim.W3D](#), downloaded 86 times
 - 8) [hnd_cntd.W3D](#), downloaded 85 times
 - 9) [hpad_bolt.W3D](#), downloaded 89 times
 - 10) [ob_ribs.W3D](#), downloaded 81 times
-

Not has been being looked for. We need actual bumpmap textures painted for those textures, not

a grayscale versions of the textures, not w3d files with a bump map applied to them.

So you are looking for this:

If so I did all 15 of them.

File Attachments

1) [ref_corg.png](#), downloaded 307 times

2) [HeightMaps.zip](#), downloaded 80 times

Lol even more picky then that. He wants hight maps and not bump maps so thats why the two are confused. Bump maps just take greyscale and give sharpening, where as hightmap has to be created from scratch based soley on elevation and where the light would hit off it.

The only way you can really do it properly is to use a program to generate it based on the photo. There could be some photoshop plugins specially for it, but otherwise i have yet to run into any. So i garuntee those aren't what hes looking for as that ref_corgs elevation map would be 100% black where it dips in then pure white for the very center and a gradient blend for the rest of the shades.

I am pretty sure by now hes already solved the problem, otherwise maybe someone will grab the photoshop plugin and get those done for him.
