When I try to export the model it just stops on a certain mesh, it doesn't crash, or cancel, but just stops. Strangely, it does export the mesh. [January 17, 2003, 09:02: Message edited by: OrcaPilot26]

Does the mesh have a lot of polygons in it? That could stopping (or extremely slowing) the export.

hmmmm It seems to actually be an error in exporting the model, It asks me if I wantto save a backup of the scene when I try to export it.
