i have 3 ren serials, one of them is my own. the other was a tmp shared one. and the pther was a serial that a freind give me who doesn't play ren anymore.

why is it that i go to login and all of a sudden, none of the serials work. appenrently they are ALL shared. what can i do to fix this? i have not given my own serial out and its saying that i shared it :/ it has worked before. but it isn't now.

Your internet folder (c:\westwood\internet) might have things missing, or you tampered with it, (or

something else has..) Reinstall it. Thats my best guess.

Ow noes! You went against Xwis' strategy of only allowing the first page servers to get traffic

j/k
