This is the first game i played on multiplayer, is it still going.

I still have the original copy of the game, will it run on my rig of today or are there some mods i need to download etc.

Any help in this would be greatly appreciated.

Thanks in advance for any help.

So i do all that then i can play it as normal.

Does this use gamespy or can i find servers from within the game.

Either. Many servers are on both GameSpy and XWIS (XWIS is the Westwood Online replacement, run by strike-team)

Personally I play on xwis but gamespy alo works.

This link advices you the 'prefered' setup of many players. But you can also still play with the vanilla install + patch 1.037 .
