The instructions are pretty straight forward, which part don't you understand?

well, it doesn't explain what you really have to have. this is what i did, and i think its right
1.downloaded <http://black-cell.net/SSAOW1.5LFDS.zip>
2.copied all my game
3.replaced the files inside the copy with the ones in the zip.
it doesn't change a thing

edit: what are those links for?

Is your server on Windows or Linux? <http://black-cell.net/SSAOW1.5LFDS.zip> is for Linux,
<http://black-cell.net/SSAOW1.5WFDS.zip> is for Windows.

replaced all the files with the windows version, but on startup it says critical error and says it only supports dedicated servers

Yes, you cannot use it if you're hosting a game with your client. It only works with the FDS.

Guys, stop. Can't you see that we're wasting our time here?

1. No new servers needed at all: there's already over 3 times as much server slots as players
 2. This guy doesn't have a clue what he's doing ("what's a subforum"?)

if i did know what i was doing, i wouldn't be asking questions in the forums.

Quote: 2. This guy doesn't have a clue what he's doing ("what's a subforum"?) alright, have less people in the ren community then. according to you we are no-longer allowed to ask questions in the ren forums.

we all start from scratch, you indefinitely did to

NO MORE QUESTIONS IN THE RENEGADE MOD FORMS, ALL IT DOES IS GET PEOPLE ANSWERS THEY NEED. AND THATS JUST WRONG!!!! PEOPLE SHOULD HAVE TO STUMBLE BLINDLY AROUND FOR YEARS, THAT WAY NOTHING WILL GET DONE. AND THATS THE WAY I LIKE IT, MAKES ME HAPPY.

i agree, now all we need to do is

- 1.get the admin to comply to it
- 2.get permission from goztow seeing as it was his idea

nice sentences, adding it to signature

The first thing u should do if you have a question is use the search button (preferably in the correct subforum).

And jerad: I'm very happy to see that you managed to answer this guy's question.... oh wait, u didn't...

I am glad to see that you are still not helping, use the "search button", will thanks for your input you really helped. Maybe he asked because he couldn't find it using the search button. And if you did find it why didn't you answer his question, or perhaps you know even less than he does. Actually I have never seen you answer anyones question, does this mean that all of your 2664 + messages are useless crap. If so I guess I'm done.

Goztow you moron he never even asked what a subforum was, he said
dthdealer wrote on Mon, 15 January 2007 00:18 subforum?
He probably couldn't find it.

So to answer Goztow's question:

We are in a subforum right now its a sub category of the mod forum (this answer will not be found by using the search button, will I guess it will now).

That's a forum, not a chatroom !

No really, this guy doesn't even know what a subforum is.
It's a waste of time to explain something to someone who isn't ready to use his braincells.

I agree with Goztow.

Okay first off he never asked what a subforum was he just said:

dthdealer wrote on Mon, 15 January 2007 00:18subforum?

If you click on the link it starts a download, he just probably did not know where the subforum was located.

Second, this is a sight for talking about Renegade and helping people accomplish what they are trying to get done, if your not going to help then just don't say anything.

My original post was deleted, but just as well, it would not have made you guys to happy.

Third you misspelled my name.

RulesSpelling/Grammar: This is a gaming forum, not literature. Keep the urge to correct to yourself. If it pains you so much to see someone misspell a word, miss a comma, etc., give them lessons in private because we don't want to see it on the forums. However, we would appreciate it if everyone's post was at least legible.

i always thought moderators were suppost to enforce these rules

At least we have someone that can keep form acting like a four year old. Now I think you guys have managed to prove my third last post. If anyone can use their eyes I was not on my normal computer that day and some of the keys did not register.
My computer:

From: *midco.net
The computer I was on:
From: 206.176.100*
So try to keep on topic.
