yeah thats pretty much it... i start my co-op server, and it crashes 1min into it.. any suggestions?

All it does is restart over and over again, i can join but kicks after like i said... 1 min?

Anything helps thanks

Which Co-Op are you using?

If you are using your own custom made, that could be the reason why..

If you are using Game-Maps.net's version, then it shouldn't crash unless something is wrong with your configuration, or your pc could just be messed up.

Thanks For the Help... I figured it out now, and its working pretty good

Thanks Again

Can you tell me what exactly you did to install the files on your server?

It *should* work 'out-of-the-box' really if you place the files in the right folders etc.

I installed it right to the RenegadeFDS\Server folder.

Can you show me a screenshot possibly of all the files that are in your /server/ and /data/ folder ?

(blank out anything "secret")

Well im not running it right now.

I been trying to get a job and work on some map's.
