Because you don't have the map the server is running.

You can download maps from a load of places.

[http://www.distortigaming.com/index.php?categoryid=10&p13\\_sectionid=4](http://www.distortigaming.com/index.php?categoryid=10&p13_sectionid=4)

<http://www.game-maps.net>

<http://www.cnc-source.com> and other places.

Hope this helps.

It could mean you don't have the same client version either.

Also, for further assistance, please post in the correct forum category so the members of the community can better help you.
