Ok, First off:

Westwood closed down some time ago, WOL (Westwood Online) moved to XWIS, who have a different system for nick registration:

Main menu --> Multiplay Internet --> Westwood Online --> Advanced Game Listings

and a box saying "Login:" and "Password" will appear. Enter any name you like (up to nine letters or numbers) and any 8 letter password, if no one else has registered the account, it's yours.

This is also in the wrong place, still, that was your first post.

That usually means the nickname you choose is already registered to someone else, try a different nickname.

To reset the passwords, login with with a name and password that you know is wrong. Then, go to the Chat, and in the chat, type "reset passwords". A message will popup telling you the passwords for the names associated with your serial.

Cause they want fucking idiots like yourself to use them and exploit them and then slowly ruin the game.

We don't ban cheaters from here, but we do frown upon them.

The 'cheats' for GTA / other CnC games etc are intended for single player use and are built into the game by the developers. The hacks you are using are NOT built into the game, are NOT for use in single player, and ultimately ruin the game for everyone...

Yeah, that's why you made a new thread over there AFTER you replied here:

Also, GJ = good job, not a person's name.

[Glitch] - New Prob With 1.3.1

HEY, when i go to renguard via 1.3.1, the renguard says

and i waited a long time then nothing comes up.
so i pressed renegade and when i want to join the game crashes and goes to the desktop.
but when i dont use 1.3.1 the game works.
so the problem is 1.3.1 how do i fix it?
