Well there guys, I decided to give downloading RG one final run- I made it this far, so theres no point in turning back.

I get this problem- I downloaded CP1, Unzipped it, The patcher, Unzipped it, CP2, Unzipped it.

Then, i tried to run the patcher, and it said, on a little black screen, "Cant Find Patch File"

Yes, I have 1.037

Yes, I have Renguard AFTER 1.037

Yes, I followed his instructions to the best of my ability.

So you manually downloaded the core patches. Did you download both 'patcher' and 'patchall' for CP2? The sticky about CP2 manual install gives a download link to the 2nd file in one of the lower posts.

Jonwils Stiky-

It said, if you have Cp1, Installed, then do "this" one...

Now then, when i read that, i was in the middle on installing Cp1...suggestions?

Edit:

Im in the middle of installing "pathcall"

Edit 2: Done installing "patchall"

Now what?

Wont let me edit it anymore...  
anyways:

[http://s176.photobucket.com/albums/w196/cheekay77/?action=view&current=patch error2.jpg](http://s176.photobucket.com/albums/w196/cheekay77/?action=view&current=patch%20error2.jpg)

Thats my folder, check it if youd like...  
Suggestions?

I wonder if cp2 and patcher - files need to be in those seperate subdirectories or need to be directly in the renegade folder...
