Hi guys,
in renegade i was playing very well, then i log out after like 2 min, i enterd a server, when i joined i couldnt move or look around with the mouse and there is no escape or W S A D movments keys and space and ctrl and shift nothing works.
then i pressed ALT + CTRL + delete then i got out of the game,
then i tried to get inter again and then i played the missions,
and in the missions i couldnt move and in the enternet i couldnt move, then reinstall the game,
then it worked fine after 2 days, the same things happend.
plz guys what do i do to fix that, i dont wanna just keap re installing plz guys help help help help
help help help help help help help help help help help help help help help help help help help

the keys W A S D but i the sulotion.
it was that the game controls automaticly goes emtpy so i must everytime i start the game load default so controls go back.

i dont know why did this happen but thx guys for replaying thx very much.

i play now renegade alert (a path beyond)

Thats what happens when you use cheats, It brakes your game.

Hi suprat, stop using cheats and the problems will go away!

Must be a dynamic IP, but two people from Jordan in a few days is not likely (even if the second one does say they are in Iraq even though their flag shows Jordan)

UPDATE: ipbot confirms that these two people are more than likely one and the same... three ip's in one day on the 29th, very dynamic, looks like someone is trying to bypass ip bans

ok anyway the cheats do not work always and it is very hard to put it, so i dont play renegade now, i play a path beyond and i dont wanna cheat and thx for asking

and how do u know these things.
