I get this question a lot through RenHelp and I cant seem to fix it either.

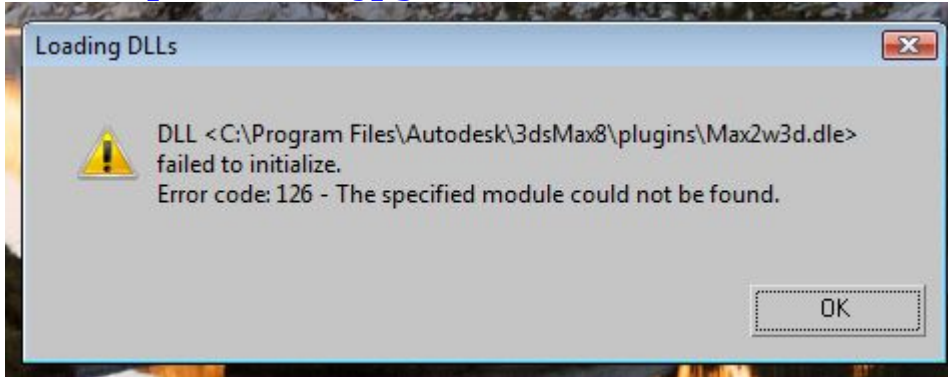

On 3ds Max 8, people are getting this error:

I upgraded to the latest DirectX 9.0c drivers and updated max 8 to service pack 3. I asked them to do the same.

I know it will work with Max 8 because I made the video tutorial in max 8. I know I have done these things properly but I don't know for sure if they have. I'm running Vista Ultimate, so it maybe a problem on my end.

I've gotton that all the time, when installing the tools to Max 9.

In the past i just left it and it still worked fine.

Try uninstallling Max 9 or the w3d tools from there.

So it does work with Max 9?

I figured out the problem, you have to download a distribute with all the files, the web setup from Microsoft will not work.

Doesnt work with max 9

Max 9 you have to compile with something else, whatever max 9 uses... I went thru the problem not to long ago.

Talked to saberhawk about it and max 9 uses a different language or different version of a language, visual basic 2005 maybe??
