I haven't seen one as of yet but maybe if you explain what you want it to look like. Some one will attempt to make you one you never know.

extract it from one of the modded versions of city (forgot which one) with xcc. dont post a map online with it unless you have the creators perm first.

Ripping? It came from a package that was released to the public domain, for everyone to look into, experiment with, and use... I don't really see any problems as i have seen the gdi turret used in numerous maps made by different authors.

Modding tutorial pack

This is for those of you out there who want to know how to install the vehicles i made for this map in their own mods.

Next time, check your resources before trying to make a deal out of nothing, thanks.

Comrade wrote on Sun, 04 March 2007 19:34Who gives a shit? All SgtMay did was changing the color.

I think I'll use something from APB and I won't give credit, who gives a shit, all they did was change some stuff.[/sarcasm]

It's a rule of modding. Always give credit to the appropriate authors, even if what they have done is really simplistic.
