Ok, I am willing (with RGs aproval of course) to fix pt icons and strings. I'm going to add a bit of stuff. I'm adding the name of the weapon to it. (like instead of laser rifle, it would be fire fly laser rifle.) or (the name Kane gave it in td) sekii wel stealth tank. sekii is prnouced(s-E-key) and wel is prnouced (Wh-ell).

The icon fix and string fix really points to the pt extras. There are icons of the extras. I don't know why Westwood/eala didn't put the icons in.

No its from the name kane gave in tiberian dawn (C&C1)

The Extras are the extras when you press ~ then type in extras. Then at pt hold down alt (or maybe shift) when you click on the vechs or chars icons
