Im not very familiar with this program i used to use photo shop deluxe but i heard this is better although i am having alittle trouble: i want to make a skin and i want to use a picture from the internet and paste it on my skin. but when i try to crop the internet picture it just moves where i want it to but it doesnt go to my .dds skin file. I even tried selecting the picture that i cropped and press CTRL C and then CTRL v but the image comes up agian but its not pasted onto the skin.Anyone know what to do?
